Safety and Security Statement

Aim

At Leeds Menorah School the safety and wellbeing of our pupils, staff, and visitors is our highest priority.

Security on site

To help maintain a secure learning environment, the school has a dedicated security guard on site during operational hours, as well as secure perimeter fencing and controlled security gates.

Access to the school site is strictly limited and monitored. All visitors are required to report to reception, sign in, and wear appropriate visitor identification while on school premises.

Entry points are supervised and access is carefully controlled throughout the school day.

CST support

As a Jewish school, we take our responsibility for security particularly seriously and work closely with **Community Security Trust (CST)** and other appropriate agencies to ensure that our community remains safe while maintaining a warm and welcoming atmosphere for pupils, parents, staff, and visitors.

As part of our commitment to safeguarding and benefits from regular security assessments and advice from CST. Our security procedures are reviewed on an ongoing basis to ensure they remain effective and proportionate.

In addition to these enhanced security measures, we maintain a positive relationship with local policing who conduct regular patrols and support where needed.

Safety and security procedures

The school operates all standard health, safety, and safeguarding procedures expected of UK educational establishments, including staff safeguarding training, emergency evacuation procedures, risk assessments, first aid provision, fire safety measures, and robust child protection policies.

We are committed to providing a safe, secure, and welcoming environment in which every child can learn, develop, and thrive.
